

TECH SPECS

Tech Specs for the historic Electric Theater located at 68 E. Tabernacle St. in St. George, UT, 84770;

The Electric Theater is a historic venue in downtown St. George, UT. It uses an Eiki 6000 Lumen HD Cinema Projector. The projector uses 10-bit color Depth, displayed on a 25 25-foot screen. Due to the venue being a multi-use space, the theater uses Stereo Surround on a 32 32-channel board to host a wide variety of events. There are 300 seats, including a balcony. We're working with the city in an effort to install DCP but it won't be in place in time for the 2024 Desertscape International Film Festival.

As far as what we need from our filmmakers; A high-quality HD version of your film, using stereo sound is ideal. MP4 or .Mov is fine. If your film is subtitled, please send a file with the subtitles burned in.

If you have any further questions, feel free to email us.

Thanks,

The 2023 Desertscape International Film Festival Team
